Dismantling of Airbag system

Take the responsibility for correct dismantling and assembling. In case of washing or mending of the vest/jacket, the Hit-Air has to be dismantled and assembled carefully and correctly, otherwise it may not work as originally intended or may be damaged.

How to dismantle the airbag system (Key Box Y-type)

1. Spread out the vest/jacket on a flat surface.
2. Unscrew the CO2 cartridge to remove.
   **CAUTION** Never attempt to turn, loosen or remove the CO2 cartridge except for reassembling.

3. Unfasten plastic buttons and Velcro of the neck and hip cushions.

4. Fully open the front zipper and the zipper across the lower part of the inside of the vest/jacket.

5. Open 3 zippers for the back cushion (A) and for the body cushion (B, C) of the inside of the vest/jacket.

6. Open the fastener (C)

7. Take the end of the neck cushion out through the opening of the left shoulder, unfasten Velcro around the neck and pull it in the direction of an arrow to be separated from the vest/jacket.
   **CAUTION** Don’t pull air cushions by force. It may cause damage to the Hit-Air.

8. Unfasten Velcro around the key box opening to separate from the vest/jacket.
   **CAUTION** Do not wash! Airbag and Protectors.

Take the Hit-Air system and shoulder, elbow and back protectors out and wash or launder the vest/jacket only in accordance with the washing instructions.
